Samling Group Donates Second PCR Machine to Miri Hospital

Samling rose to the occasion once again by donating another unit of PCR machine to Miri Hospital on 25 November 2020 to help boost the division's Covid-19 testing capacity. This is Samling's continuous effort in its Corporate Social Responsibility, to take a lead in time of need. The first unit of PCR machine together with other essential laboratory equipment were handed over to Miri hospital in April 2020.

Miri Hospital's laboratory is currently catering for Covid-19 RT-PCR test for Sarawak's northern region comprising areas in Miri, Subis, Beluru, Marudi, Telang Usan, Limbang and Lawas with a daily capacity of approximately 200 tests per day. According to Dr. Jack Wong, a total of 42,291 swabs and RT-PCR tests have been performed for individuals in the Miri division since the PCR lab at Miri Hospital was set up in April 2020. With a new PCR unit coming in, it will further boost the testing capacity to a range of 350 to 400 tests per day.

Meanwhile, Datuk Lee and Dr. Jack Wong were very grateful and thanked Samling for the generous donation. Chief Operating Officer of Samling, Mr. James Ho, handed over the PCR machine to the Director of Miri Hospital, Dr. Jack Wong, witnessed by Datuk Lee Kim Shin, as well as the medical personnel from Miri Hospital and staff from Samling.
